Switch between SBC/DBC Case

Handwriting Recognition Input

Chinese/English/Japanese/Korea input is available in the handwriting recognition. There are multi-box/single box/full screen for handwriting.

Full Screen Handwriting (for chinese)
You could switch the single/multi character recognition.

Standby for Recognition

Standby for Association

Multi-box Handwriting (for chinese)
You could write the single character on each handwriting box.

Standby for Recognition

Handwriting

Standby for Association

Single Box Handwriting (for chinese)
You could switch the single/multi character recognition.

Handwriting   Standby for Recognition

Instruction for Keys

|		
⓪~⑨ numeric keys	tap to choose the language	the soft keyboard of the same language
shift into the symbol keyboard	Space key, input the space	Enter key, confirm operation/shift line
Del key, delete the cursor's right & left character or select the string of characters	switch the multi/single character pattern	
switch multi box /single box for handwriting	switch single box/full screen for handwriting	

Input Method

Write in the handwriting area with stylus⇨Wait the recognition after stopping writing⇨ Tap the standby for recognition or association (Chinese handwriting only).

For example: Input " 李清照 " at Text Editor function.

① Write in the handwriting area with stylus... → ② Wait the recognition...

Inputting with handwriting, if you want to increase the input speed, please switch to the multi character pattern. By this pattern, you could write multi character words continuously. If you want to increase the accuracy of recognition, please switch to the single character pattern. By this pattern, you could only write one word at one time.

Word Searching

Take Oxford Advanced Learner's Dictionary as an example to illustrate the method of searching a word.

Searching Method

- If you know clearly the word's spelling, you could just input the word and press Enter for confirmation. This is called Accurate Search.
- If you know the past tense/past participle of a verb, you could get the original verb. This is called Original Search. (*For example: If you input "walked", you would look up "walk"*)
- If you are not sure of a word's spelling, you could use Wildcard Search. Input all the letters you know, and then replace the unknown letters with "?" or "*". "?" stands for an unknown letter. "*" stands for a string of unknown letters. (*For example: If you input "pron*n*tion", you would get "pronunciation"*)
- If the word you input is not found, the device provides other two ways to look up: ① Spelling Check (displays the list of words similar in spelling); ② The Nearest Word (displays the nearest word in order).
- If you want to search for the sentences/phrases/all text of a word in the database, please input this word and then press Search .
- You could search the unfamiliar or phrases on the explanation screen. This is called Multi-layered Search. On the explanation screen, highlight the unknown words or phrases to be looked up. And press corresponding keys to search the results.

For Example, accurate Search for [good]: On the index screen of Oxford Advanced Learner's Dictionary, press G, O, O, D and Enter in turn.

For Example, wildcard Search for [pron*c*tion]: Press the string of the word and then press Enter.

For Example, multi-layered Search for [quality]. On the explanation screen of [good], highlight the [quality] with stylus, and tap E-C.

Pronunciation

- If the explanation screen shows 真, you could tap the icon 真 to listen to the word's pronunciation.

- If you want to listen to the syllable pronounce, press 音节 on the explanation screen.
- If you want to practice reading, press 正音 key and then according to the cue on the screen to read after device or have comparison.
- If you want to listen to the pronunciation of example sentence, press 朗读 on the example sentence screen.

↥ Practice reading -- production

- If you want to listen to the pronunciation of any words or sentences, please highlight them, and then press 发音 or 朗读 key.

Search Engine

There are two other kinds of search for files on Search Engine besides the search for dictionaries.

Data: Input files' partial/full name to search the matching text file.

Multi: Input files' partial/full name to search the matching Video, Audio, Flash or Photo.

↥ Search Engine -- Look up unknown word at any time

- *Searching for data or multi files, if you want to find the same kind files at a time, you could use [*] to perform the wildcard search.(for example, search for [*.txt] you could find all text files. Search for [*.mp3] you could find all MP3 files.)*
- *On the data browsing screen, highlight the key word and then press Search key to look up this unknown word.*

MP3

MP3 supports simultaneous conveyance of sound and lyrics, provides A-B record playing function. You could also close the MP3 screen when MP3 keep playing. You can listen the music and use the other functions of the device at the same time. (Such as: consult a dictionary, text editor, etc.) You can go back to [MULTI→MP3] to control MP3.

Instruction for Keys

↻↪: [Z] Key, To switch the language displaying in lyrics

LCD OFF: [G] key, To close the screen. Press [On/OFF] to show the screen

skin·lyric·list: [Y] key, To switch the play list/skin list/lyrics list. Tap to show two types skins of MP3 for users to select

→·⇌: [R] key, To enable / disable repeat mode

↻: [C] key, To select order of playing

≡: [L] key, To show the list of songs

◀◀/▶▶: [Q]/[F] key, To fast forward and fast reverse functions

◢/◣: [A]/[B] key, In repeat mode, to replay/finish replay from the current time

■: [S] key, To stop playing

|◀/▶|: [⌃]/[⌄] key, To select upward/downward

▶·||: [P] key, Play / pause, to play / pause song

⏏: [U] key, Open file to select song

–·+: [I]/[O] key, To select lower / higher sound of the music

Common Used Functions

• You can find the music from the folder where the music is placed. First, choose the MP3 file that you want. Second, tap [Finish] for confirmation. If you want to go back the preceding menu, you can tap the accelerator key [↰].

• When you edit the MP3 play list, please tap [Load] then you can have a manual operation on openning the MP3 files. Tap [Auto Search], the device can auto search download data for MP3.

• In repeat mode, please open the function of repeat, and then you could set the beginning (A) and ending (B). This [◢◣] would show you the length of repeat. If you want to stop repeating, you would just shut down this repeat mode.

• The function of simultaneous conveyance of music and lyrics can be realized only if the two files with the same name and suffix. Such as " 牵手 . lrc" and " 牵手 .mp3" are put into the same folder.

Device Settings

Time & Date	Our device's initialized time is 2088/08/08 8:08 am. If you want to change this setting, you can enter World Time and then choose [Set Time]
Volume & Brightness	• You can tap [设定] on the tablet key to set up the volume, speed and brightness • You can set up the startup music, turning on/off pen and key tone etc. through Sound Setting
Startup Picture	You can change the startup picture in the Startup Picture setting
Language	Switch among multi kinds languages of menu displays such as Chinese, English, etc. through Menu & Language Setting

Input Method	If you want to enable/disable one kind of input method, you can set up in the Input Setting
Handwrite penup time	The initialized handwrite penup time is 0.6 seconds. You can set up in the Handwriting Setting
Touch Panel Calibration	You can adjust touch panel calibration in the Handwriting Setting
My Setting	My Setting allows to set colors for topic, dictionary and desktop. It also allows to select USB Auto Connection and Effect Control, please open the My Setting
My Favorite	According to user's favorite to set My Favorite, you can use My Favorite easily to get the functions which you need, please open the My Favorite

EARPHONE
• *The sound volume of the earphone should be not too high so as not to injure your hearing.*
Mobile Hard Disk & Data Download

Our device could be used as the Mobile Hard Disk: Connect USB cable into the corresponding jack, device will enter the picture of "PC Link (USB Disk)".

- Make sure the newest operation system of Microsoft is set up on the computer. So that the USB mobile device could be auto-identified.
- If the mobile device could not be identified, you can consult USB Driver Readme in the product's CD-ROM and set up the USB Driver.
- Allow USB 2.0 High Speed.

You can download the data from the website after seeing ⓔ: Connect the device and PC by USB cable. The device will enter the picture of "PC Link (USB Disk)". The followings are ways to download.

① Install PC Service Home in product's CD ROM, and then download through the [Media Download].
② Download through Mobile Hard Discs Copy.
③ Please log-in our website to download On-line Service. The files which are downloaded in the computer are named as [.exe]. Double tap these files and choose "Download to PDA ". Details would be talked about in the user's guide.

The device provides automatic searching function and allows user to create new folder for data. Parts of file formats must be identified for easy retrieval, so please put the download data under the following right way.

- \MULTI\TEXT\   Text Editor
- \STUDY\EXTRADIC\   Extension Dictionary
- \APPS\CALC\   Calculation

🐾 • *Please do not remove the cable, close the PC Service Home program or turn off the power while synchronizing, they may cause system corruption and damage to your data.*
• *If you want to remove the cable, you can press* Esc *key on the device to disconnect safely.*

Specification

LCM	4.3" WQVGA (480 * 272) TFT, 24 bit color
Battery	Lithium battery 3.7V/1270mAh
Adaptor	Input: 100-240V/50-60Hz Output: DC 5V/1A
Expansion Slot	MultiMedia/Secure Digital/Secure Digital High Capacity Card
USB Jack	USB 2.0 High Speed

Maintenance

- Keep it dry. Precipitation, humidity and liquid that contains minerals will corrode electronic circuits.
- Do not use or store it in dusty, dirty areas as its detachable parts may be damaged.
- Do not store it in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and melt certain plastics.
- Do not store it in cold areas. When the device warms up, moisture can form inside it, which may damage electronic circuit boards.
- Do not attempt to take the device apart. Improper handling may damage the device.
- Do not drop, knock or shake it. Improper handling may cause damage to the liquid crystal panel.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.
- Do not paint it. Paint can clog the device's detachable parts and cause it to malfunction.
- Do not operate the device below the temperature 0 or over 40 degrees. Excessive heat or cold will cause malfunction and incur damage to the device. To avoid such from happening, please do not use the device for two hours after it has been exposed to excess heat or cold, because the humidity or moisture formed by the temperature changing will cause damage to the device.

⚠️ **We are obliged to charge user maintenance fee if the product is damaged due to liquid percolation, improper placement of the product (such as eroder by moths), or breakage on the screen (such as screen scratching or breaking) such man-made damages.**
